Directions:

* Cut out 12 red and 12 blue game pieces.

* One person plays red pieces and the other person plays blue pieces.

* Set up your 12 pieces on the black squares. See the picture below.

* Rock, Paper, Scissors to decide who moves first.

* Move your piece in a diagonal direction to the next black square and perform the exercise in the box. You can't move backward.

* If your opponent's piece is in front of yours and there is an empty space on the other side, you can jump it and take the piece.

* If you get one of your pieces to the last row on the other side, that piece becomes a king. Another piece is placed on top, so now it is 2 pieces high. A king piece can move forward or backward.

* A player wins when the other person has no more pieces left or can't make a move. If neither player can make a move, it is a tie.

* HAVE FUN!!!
